

## **MEDEUROPA STRENGTHENS ITS POSITION IN GERMANY**

02.07.2021 – MedEuropa, a company dedicated to cancer care across Europe, has finalised a partnership with Zentrum für Strahlentherapie Rheine-Osnabrück (“ZSRO”), a leading provider of radiotherapy treatments in North Rhine-Westphalia and Lower Saxony.

ZSRO provides high-quality radiotherapy treatments to over 3,000 patients per year, operating five linear accelerators across three locations. Since the establishment of the centre in 1999, beginning with a single location in Rheine, the shareholding doctors have invested in improving the quality of care for cancer patients in the region. This has included the opening of two further locations in Osnabrück and Georgsmarienhütte, together with continuous investment in modern radiotherapy equipment, ensuring patients receive the highest quality of care.

Through its unique partnership model, MedEuropa is delighted to collaborate with the doctors of ZSRO, who have reinvested alongside MedEuropa and will continue to lead the operations and support the future growth of ZSRO in the region.

This transaction strengthens MedEuropa’s presence in Germany, which now comprises six locations, and establishes a strong regional platform, well-positioned for further growth in North West Germany. The partnership with ZSRO follows MedEuropa’s acquisition of Margarethenklinik Kappeln, a plan hospital in Schleswig-Holstein, which was completed in February 2021. The hospital has a care contract in accordance with German healthcare regulations, providing a platform from which MedEuropa can establish or invest in outpatient medical centres (“MVZs”), supporting its strategy for growth in Germany.

MedEuropa, owned by Telemos Capital, has the ambition to become the leading independent provider of cancer care in Europe, with a strong focus on radiotherapy, and is continuously looking for new partnerships with leading medical teams.

## **About the Zentrum für Strahlentherapie Rheine-Osnabrück**

Zentrum für Strahlentherapie Rheine-Osnabrück (“ZSRO”) operates three locations in Rheine, Osnabrück and Georgsmarienhütte, on the border of North Rhine-Westphalia and Lower Saxony, providing radiotherapy treatments to over 3,000 patients per year. ZSRO is led by four independent doctors, who operate five linear accelerators of the latest generation and benefit from a robust referral network, supported by an established presence at multidisciplinary consultation meetings in the region. The centre is the leading provider of cancer care in the area.
